MARK ARDON P. BAÑGA

Software Developer

Software Developer with hands-on experience in front-end and full-stack development across airline e-commerce, enterprise point-of-sale, and tenant management systems. Skilled in translating stakeholder requirements into responsive interfaces, backend services, database changes, and maintainable business logic. Experienced in Agile delivery, unit testing, A/B and multivariate testing, code review, technical documentation, and cross-functional collaboration.

EDUCATION

University of Cebu Lapu-Lapu and Mandaue — Bachelor of Science in Information Technology — **2019 - 2023**

WORK EXPERIENCE

Alliance Software Inc. - Software Developer (Front-end) — **November 2023 - August 2025**

Project: Online E-commerce for a Major Philippine Airline

- Collaborated with stakeholders to gather, clarify, and translate business needs into technical requirements for online booking, check-in, and test-and-learn features.
- Developed and enhanced responsive front-end features and implemented interfaces from approved UI/UX designs.
- Executed A/B and Multivariate Testing (MVT) through the Insider platform to validate experiment variants.
- Performed unit testing, collaborated with QA teams, and participated in code reviews to maintain functionality and code quality.
- Maintained technical documentation including workflows, testing results, release notes, and user guides.

Alliance Software Inc. - Software Developer (Full-stack) — **August 2025 - April 2026**

Project: CloudPOS - Enterprise POS and Retail Management System

- Worked with technical leads to clarify feature requirements and translate them into technical implementation tasks.
- Developed and maintained backend modules using Java Spring Boot, JPA, and MySQL.
- Built and enhanced frontend components using React/Electron and TypeScript.
- Implemented business logic for product, inventory, and transaction-related modules.
- Performed database updates and query optimization to support application functionality and performance.

Alliance Software Inc. - Software Developer (Full-stack) — **April 2026 - August 2026**

Project: Tenant Management System

- Worked with technical leads to clarify feature requirements, expected behavior, and technical implementation details.
- Designed, developed, and maintained backend services using Java Spring Boot, JPA/Hibernate, and MySQL following RESTful API and microservice architecture principles.
- Developed and enhanced responsive frontend applications using React and TypeScript.
- Implemented sales data upload and processing services, API Gateway authentication and routing, and File Service APIs for automated file ingestion and processing.
- Performed database updates and query optimization while supporting service integration across the application.

SOFT SKILLS

Stakeholder Collaboration: Requirements clarification, technical coordination, and cross-functional collaboration with technical leads and project stakeholders.
Technical Communication: English - Professional working proficiency; Tagalog - Fluent; Cebuano - Fluent.
Documentation & Precision: Technical specifications, workflows, testing results, release notes, and user guides; typing speed of 97-112 WPM with 95-98% accuracy.
Technical Adaptability: Able to work across frontend, backend, database, testing, and delivery tools in Agile environments.

TECHNICAL SKILLS

Frontend Development: TypeScript, JavaScript, HTML, CSS, Angular 15, React, React TypeScript, React Electron, Bootstrap.
Backend & API Development: Java, Spring Boot, JPA/Hibernate, RESTful API development; additional experience with PHP, C#, and Visual Basic.
Databases: MySQL, Microsoft SQL Server; database updates and query optimization.
Testing & Experimentation: Unit testing, functional validation, QA collaboration, code review, A/B Testing, and Multivariate Testing (MVT).
Source Control & Delivery Tools: GitHub, Azure Repos, Azure DevOps / VSTS, Figma, Insider, Microsoft Office Suite, Microsoft 365.
Methods & Practices: Agile methodology, requirements analysis, stakeholder collaboration, responsive UI implementation, technical documentation.
Platform: Windows.
